1.29 m

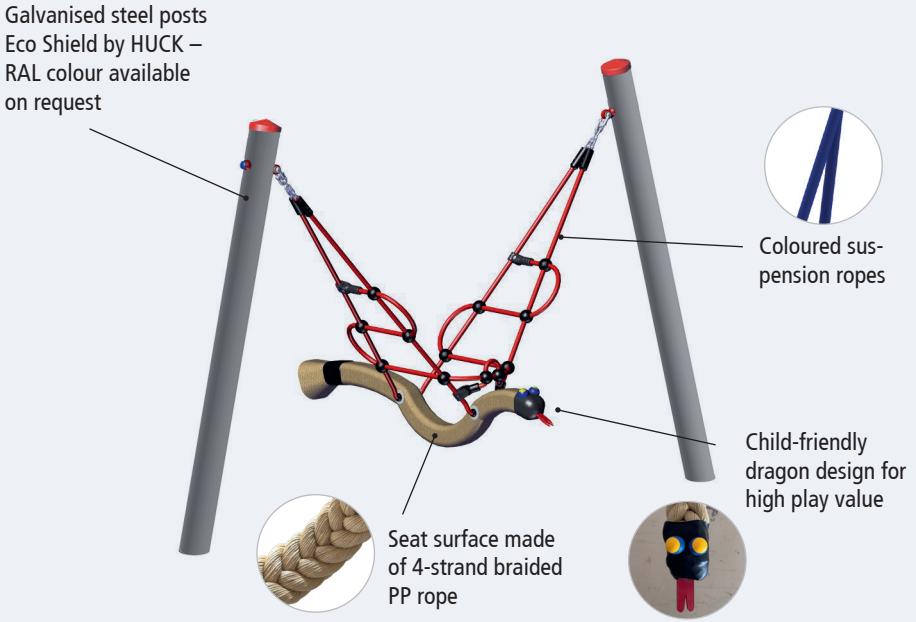

Fall height:
0.50 m

Suspension ropes:
Available in green, rust orange, blue, yellow, black, beige, grey, red, fluorescent orange, turquoise, fuchsia

Swing ropes:

beige

PEDAGOGY

The Flying Dragon Mini creates a playful connection between movement and imagination. Thanks to its special "riding-style" seating position, children immerse themselves in an imaginative play world that combines active movement with role play. The secure grip provided by the side ropes allows children to confidently explore new movement patterns and gradually discover their own abilities.

INCLUSION

The dragon swing enables shared play experiences for children with different motor abilities. The stable seat, combined with side support ropes, provides additional safety and orientation. This makes the swing easier to use and reduces barriers – encouraging participation, shared play and social interaction.

MOTOR SKILLS

The special design of the Flying Dragon Mini specifically promotes balance, coordination and body tension. The upright seating position and the active use of the arms engage key motor skills. At the same time, the swinging movement stimulates body awareness and supports holistic physical development.
