# Balance Rocker 30

**Platform height:**

0.54 m

**Equipment footprint:**

1.00 m x 3.58 m

**Minimum space required:**

4.00 m x 6.58 m

**Embedding depth:**

0.55 m

**Fall height:**

0.54 m

**Length of balancing mat:**

3.00 m

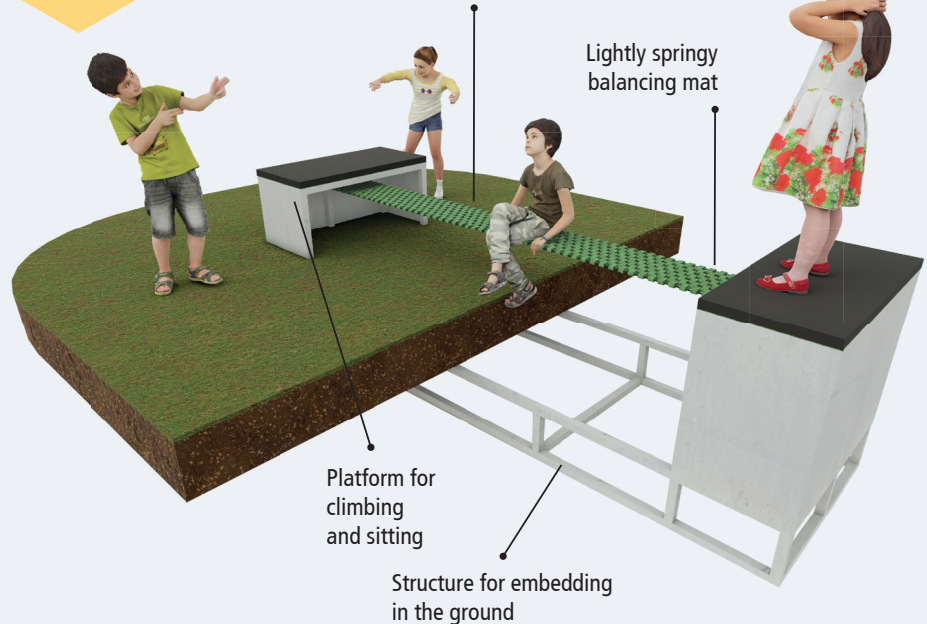

**Advantages**

- + Easy assembly
- + Designed for embedding
- + No concrete needed
- + Lightly springy balancing mat pre-assembled

**Available in many Colors**

Balancing mat in neon green, blue, yellow, red, and ivory

## EDUCATION

The play equipment with two platforms and a wide balancing mat promotes social interaction and creativity. The platforms provide space for conversations, joint play, and relaxation, strengthening children's social togetherness. Balancing on the gently springy mat further supports confidence in one's own abilities and encourages cooperation.

## INCLUSION

The practical construction with two platforms and a balancing mat promotes inclusion by being accessible to children with different abilities. The wide mat allows even children with motor impairments to participate safely. Through shared balancing and use of the platforms, opportunities arise for collaboration and mutual support, strengthening community spirit and empathy.

## MOTOR SKILLS

Our Balance Rocker specifically strengthens children's motor skills. Balancing on the mat promotes balance and coordination. At the same time, muscle strength and body control are trained, while the platforms offer space for additional movement activities such as jumping, sitting, or creative use as a stage.
