Two-colour rope wrapping possible

Seating surface available in green or orange

EDUCATION

Our Swing Seat Midi, with backrest, armrests and fall protection, offers numerous educational benefits for people with disabilities. Cooperative play is encouraged through shared activities such as pushing the swing. The fall protection ensures safety, even during intensive swinging. The swinging motion also provides sensory experiences, particularly for people with disabilities.

INCLUSION

The design of the seat takes into account the needs of all users, regardless of their physical abilities. The backrest and armrests provide a comfortable and secure seating position, benefiting both adults and children with different physical challenges. This promotes an inclusive play environment where people can interact, learn and enjoy the calming swinging motion together.

MOTOR SKILLS

The swinging motion of the Swing Seat Midi improves balance, coordination and muscle strength. Users can enhance their motor skills in a playful way while feeling safe and comfortable.
